

Tray Cleaning Machine

Automatic cleaning,
dehydration and stacking

A large labor saving is realized by line-up of washing, dehydration and stacking.

Stacking

After cleaning, it is transported to the trace tucker. It automatically stacks and discharges the set number of stages.

It automatically stacks and discharges the set number of stages.

Tray reversal

Flip the tray upside down.

Move it to the next conveyor.

Dehydration

Raise the tray and secure it with the upper rotating column. Water is removed in a short time by dehydration by high-speed rotation.

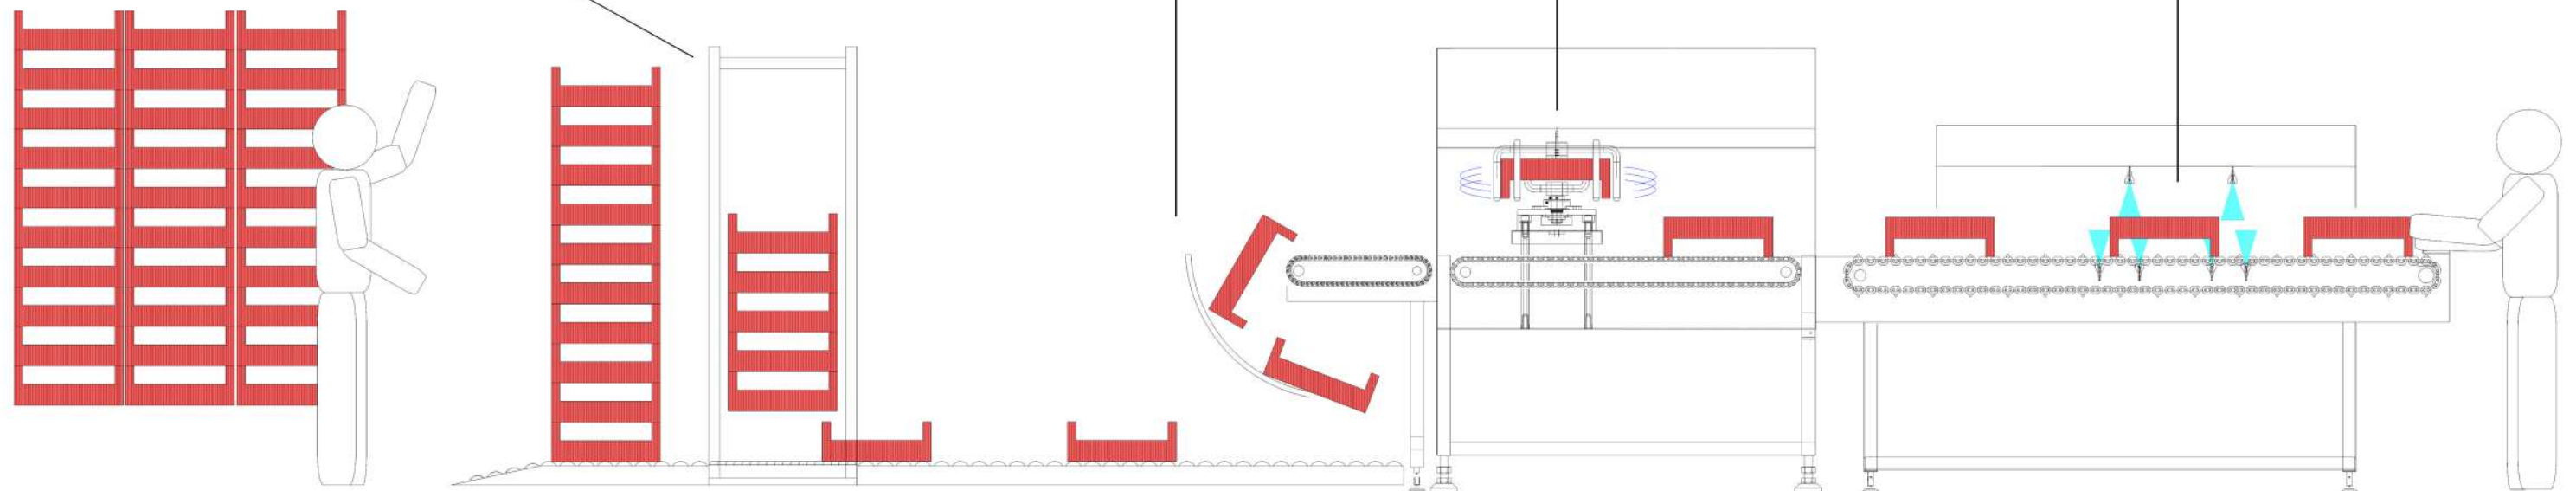

Water is removed in a short time by dehydration by high-speed rotation.

Washing

The upper and lower cleaning nozzles also remove stubborn dirt. Uses a specially shaped chain conveyor.

Even under high water pressure, the trays will not move and will be transported at equal intervals.

We will install it with your desired layout.
Can be placed at 4500mm from the washer to the dehydrator.

	washing machine	Dehydrator	Stacker
capacity		500 piece / hour	
Size	W : 1,850mm D : 2,900mm H : 1,300mm	W : 1,200mm D : 1,450mm H : 2,250mm	W : 880mm D : 1,200mm H : 2,550mm
Power supply		3 φ AC200V 150A
